To the ESGO Elections Nomination Committee

Dear ESGO Elections Nomination Committee,
Dear Professor Querleu,

In this letter, I would like to give you the reason why I'm msubmiting my application to become a member of the new ESGO Council.

First of all, I had the chance to be train in Gynaecological oncology in France by Prof Querleu and Ferron and with them quickly understand how important is international collaboration, for training, treating patients, and research. In a small country like Belgium, be open to European collaboration is crucial.

I've then discovered ESGO and all the tools that are available to improve the quality of our care to our patients. I was amazed by the important wish of all the council members to train, teach, help without judgment for the common goal to improve the quality of care in Europe. I've appreciated this philosophy that is completely joining mine.

With the help of the accreditation service of ESGO, we succeed to make thinks a change in ovarian cancer surgery in our department and to encourage the centralization of those patient, that is not legally mandatory in Belgium. ESGO helps us to improve our care and I want now give back this help.

I want to rise my implication in ESGO by becoming a council member because I believe that European collaboration is the key to the future of gynecological oncology and I want to be part of it. I'm motivated to participate in more ESGO activities, bring my help if I can, and be part of the development of the international collaboration in Europe around the care of patients with gynecological malignancies.

I appreciate your time in reviewing my application.

Sincerly yours,

Mathieu Luyckx, MD
