Motivation letter for ESGO council elections 2021

ass. prof. Mikuláš Redecha, MD., PhD.
II. dpt. of obstetrics and gynaecology
University hospital, Comenius University in Bratislava
Ružinovská 6, 826 06, Bratislava
Slovakia

My name is Mikuláš Redecha and I work at the II. department of obstetrics and gynaecology, University Hospital, Comenius University in Bratislava as the head of oncogynaecology unit. I have been working at the department for the last 15 years. I have done my oncogynaecology fellowship thesis and further my associate professorship thesis on the topics of ovarian cancer treatment and research

As ESGO council member I would like to further spread the role of ESGO in European national oncogynaecologic societies as well as in the gynaecologic and obstetric societies in Europe. This way, the ESGO guidelines and programs will be better incorporated into the national programs and protocols. I also believe that the ESGO accreditation system is a unique form of improving the quality of oncogynaecological care. This program needs to be promoted and ESGO could help the potentially applying centres to prepare its programs and so eventually fulfil the ESGO accreditation requirements.

The close cooperation between ESGO, ESMO and ESTRO is necessary for good oncogynaecological care in European countries. The close cooperation of these three societies is already in place, especially on the field of guidelines. I believe this cooperation, despite some differences, needs to be encouraged even more.

I am applying for the ESCO council membership in the 2021 elections in good will, that my potential membership in the council and work done in this body will be beneficial for ESGO itself and eventually for the quality of care for oncogynaecological patients in Europe.

Mikuláš Redecha
