The key sessions

- All early career gynaecological oncologists are encouraged to send in the abstracts of their ethics committee approved research work (Clinical trials, case series, large audits etc.). The best researches from India and our neighbouring countries will be chosen to be at the pivot of that particular session.
- The key scientific sessions will be founded on these research topics.
- The senior colleagues including the guides and co-guides of the presenter will be part of the panel discussing these research works.
- National and international experts will deliberate on these topics to explore what is *“ahead in the future”*.

Basic structure of the key scientific sessions

3. Next

By the experts
