ENYGO Workshop Teach the Teachers & Complications in Gynaecological Oncology
28th -29th November, 2014
Rome, Italy

The concept of postgraduate education has changed recently. The idea that trainees are in charge for their own education and training, has shown to improve and optimize many postgraduate medical training programs.

The first part of the workshop will be aimed at complications of treatment in gynaecological oncology. Attendees will become familiar with the most common complications of pre- and post-surgery, radiotherapy and chemotherapy and choice up-to-date treatment.

The second part will focus on effective use of learning and teaching skills, creating effective learning cycles, the most recent concepts of teaching, competency based education and assessment for learning. Attendees will be able to formulate ‘SMART’ learning aims, construct and evaluate their learning, give effective feedback, and extract information from feedback.

Mentors and Speakers
Dr. Francesco Fanfani, Dr. Vanda Salutari, Dr. Sara Giovannoni,
Dr. Pim Teunissen, Dr. Cor de Kroon, Dr. Michael Halaska, Dr. Vladyslav Sukhin
