

SEUD 5th annual congress will take place at the Hotel Bonaventure in Montreal, Canada from May 16th to May 18th 2019.

The main theme of next year's meeting will be "**Abnormal uterine bleeding and fibroids: from bench to bedside**". It reflects the very common issues gynecologists as well as general practitioners are faced with every day.

Endometriosis and adenomyosis will also be at the forefront of this scientific program which will also feature debates, live surgical retransmissions, national symposia and sponsored symposia, free communications, posters and attractive pre-congress courses.

Science is always evolving, new fundamental pathways are discovered, new imaging techniques to help make the most accurate diagnosis, new or revisited medical and surgical treatments; but most importantly, our goal is to put all of this together to offer a comprehensive program providing new knowledge, take home messages, tips and tricks, all for the better care of your patients.
